

# Software Quality Assurance Engineer

---

## Enseo

For more than 21 years, Enseo has been known as the backbone of the hospitality in-room experience. The company's superior products, including set-back boxes and applications, are preferred by the world's largest hotel groups. Enseo is a dynamic and fast-paced technology provider that is transforming industries with emerging digital products. We are always on the lookout for world-class talent with a passion for exceeding expectations. Is that you?

## General Description

The Software Quality Assurance Engineer primary responsibilities include performing quality assurance testing of new software, developing automation software, and documenting test results and maintaining a library of updated test plans and procedures. The Software Quality Assurance Engineer will also have a minimum of 2 year's experience of developing test automation software and working experience on a variety of software applications such as Linux, iOS, Android and embedded systems. We are seeking candidates local to the Plano, Texas area.

## Skills

- Do you have a Bachelor's degree in Computer Science or Electrical Engineering?
- Do you have a sound understanding of software testing methodologies and applying software testing methods and techniques to a variety of technologies?
- Do you possess excellent critical thinking (inductive, deductive and quantitative reasoning) and problem-solving skills including data analysis and validations?
- Can you demonstrate analytical skills by identifying and objectively evaluating innovative and alternative solutions to problems?
- Do you possess experience with web app development using HTML, CSS, Javascript, Python, and SQL?
- **Are you proficient with scripting tools including NodeJs, Python and Bash?**

## Responsibilities

- You will develop software testing plan, automation software and procedures on software products including embedded systems, web applications and mobile applications.
- You will Identify anomalies, investigate, and file clear and detailed bug reports; assist in correct escalation of bugs with peers and management as needed.
- You will establish regular, clear and precise communication with the engineering team regarding executed tests and observed issues.
- You will adhere to company policies and procedures.
- You will perform other related duties as assigned.

## Benefits

We value our employees' time and efforts. Our commitment to your success is enhanced by our competitive pay and an extensive benefits package including paid time off, medical, dental and vision benefits. Plus, we work to maintain the best possible environment for our employees and strive to provide a collaborative, creative environment where each person feels encouraged to contribute to our processes, decisions, planning and culture.
